

Visit from HWISE Collaborator Isabel Alvarez

This week, we were happy to welcome Isabel Alvarez for a visit to Evanston, IL. Isabel, who works with Dr. Hugo Melgar-Quiñonez at McGill University, will be implementing the HWISE survey in Guatemala. During her visit, we talked about best practices for implementation and how to adapt questions for the local context. She also spoke to our research group about the great work that McGill University and their partners are doing in the field of food security. We look forward to a long fruitful collaboration!
